

JOHN F. SIMON JR. at Macy's

23 September - 8 October 2006

John F. Simon Jr., Macy's window installation view, Chip I and Wund I, 2006, plastic laminate, acrylic plastic, LCD screen, Apple Mini Computer

GERING & LOPEZ GALLERY is pleased to announce an installation of new work by John F. Simon Jr. in Macy's 34th Street windows. The featured work combines software displayed on LCD screens with engraved and inlaid Formica. These large pieces showcase the many threads of Simon's previous work: drawing, laser cutting, and writing software, in boldly colorful and living cabinets of curiosity. This group exhibition, including work by ten other multi-media artists, was curated by Gabrielle Bryers. Simon's works are on 34th Street just off of Broadway.
